

Sustainable Procurement

Galldris Services Ltd (Galldris/ the Company) is committed to procuring sustainable, ethical and responsibly sourced materials, goods and services. The Directors and its staff recognise that the procurement of goods and services has an impact on the community and the environment both locally and globally.

Galldris considers the life cycle of a product, from sourcing of materials, manufacturing processes, transportation to sites as well as commissioning, use and future deconstruction. Material efficiency is key to waste minimisation through procurement. All temporary and permanent materials will support the requirements of BREEAM or any other project sustainable certification schemes.

Galldris are committed to the following sustainable procurement practices:

- Purchase only legal and sustainable timber products with a valid CoC certificate eg. FSC, PEFC
- Procure materials which meet certified standards where feasible including BES 6001, CARES, ISO 14001
- Products to be chosen to meet whole life carbon targets, with low carbon alternatives chosen where viable
- Products with Environmental Product Declarations (EPDs) prioritised to support accurate whole life carbon calculations
- Procure recycled materials, or products with a percentage recycled content including recycled aggregates
- Purchase of recycled and sustainable sourced paper products
- Local suppliers to be used where possible to reduce carbon emissions for transport
- Purchase of white goods to be guided by energy efficiency ratings
- Prohibit the use of products or processes which are potentially damaging to the environment, such as toxic materials, or refrigerants with a high global warming potential when a less environmentally damaging alternative is available
- Reuse and repair existing products, as opposed to purchasing new
- Continue to raise awareness of ethical procurement and procure Fair Trade certified products
- Reduce procurement of single use products, and excessive packaging
- Promote sustainability awareness amongst our supply chain partners and encourage them to adopt sustainable practices
- Plant and vehicles chosen for use on site with low emissions
- Electricity to be procured with a high percentage of renewable generation, where possible 100% with REGO backing
- Viability of alternative fuels to be reviewed per project including HVO from sustainable sources

Galldris will communicate and implement this sustainable procurement policy throughout the organisation through staff induction.

This policy will be reviewed on an annual basis and will be communicated to all persons working for and on behalf of Galldris.
